

Best Practice 1

Title of Best Practice: - Youth Awareness Programmer

Objection: - Making youth aware about their responsibility regarding clean and healthy Indian.

- * Making youth aware about their vetoing rights
- * Making youth aware about their responsibility regarding society in covid-19 times
- * Changing youth approach which will be suitable for modern time.
- * Making youth aware about hazards of plastic wastage and remedies that should be taken to prevent and wither disadvantage.
- * Increasing economic literacy of youths in times and economic globalization.

The Context:-

Youth should have basic knowledge about economic terms while increasing economic literacy as well as Youth which are eligible for voting should have registered in voting list so they can be encountered with their responsibility regarding saving and enhancing democratic values.

The Practice: - we can see in society Youths are unaware about their responsibilities in society. And this may cost heavily to Nation like India as India has higher strength and youth. For overall development of nation youth needs to aware about their responsibilities in society. As most of youth are connected to Higher education department of nation. For vibrant and active higher education youth need to be aware about their social roles also. In this charging times, world is moving fast so they to be well proposed for facing any condition in this globalized world. So this youth awareness programmer will help them to be well prepared for day to day life.

Evidence of Success:

After every session of programmer students raised their doubts. Students appeared satisfied with solution and answers student spontaneously took pledge to perform their duties which are necessary while living in society. Every student initiated registration process of voter and also started discussions about various economic processes that are happening thought the world. These changes showed that they became aware about their responsibilities in society.

Problems Encountered and Resources Required:-

As this whole awareness programmer was in online mode. Some students didn't have mobiles due to their challenging economic condition also there was network issue which disused programmer many time. There need to be some equipment's should be provided to students to avoid inconvenience.

Best Practice 2

Title of Best Practice:- Online Learning Orientation Programmer

2. Objectives of the Practice – In the time of Covid -19 pandemic students needed to be adaptable with this strange situation so this programmer hades made them capable of coping with this extraordinary situation students were able to attain online lectures on digital platform.

3. The context-Most of the population of India lives in rural areas. As compare to cities rural areas don't have that much digital reach. So during covid-19 times. Due to strict lockdown college were closed and only option available was online teaching as our college is in rural area digital penetration was so less. Due to which students were unaware about online teaching so it was necessary to conduct this online orientation programmer to make the capable for this situation.

4. In the period of globalization digital universities are setting up. So it is necessary students should be aware about the online teaching and learning techniques. Government of Indian also setting up some platforms like Swayam Moocs for online education. Also in globalization students should be aware about emerging digital techniques. So this programmer had intention capacity. During this programmer students faced some problems like due to a economic conditions students were unable to have mobile handset. Also these were some disturbances in communication.

5. Evidence of success-

/after this programmer students appeared satisfied and excited also. Their education got solved and they looked somewhat relaxed. After when all departments started online. Lectures during pandemic times students also participated very well students also raised doubts about topics through online mode. This showed that this programmer was successful because in very less time student adapted themselves with emerging conditions of pandemic.

6. Problems encountered and Resources Required-

During this orientation programmer some problems also arises. Due to poor economic conditions some students didn't had access to mobile phones. As Joblessness was increasing in pandemic parents also had some limitations to provide required things to their words.
